The file seems to show that Kuranga Corundum mean the Lease thing. The matter was decided in the Privy Council under Rule X of the Land Rev Rules - Q

22/1/00

Sub

Kuranga is near Charleston & "Corundum" as used in the order of 20 inst: is more precise & is not Shamva Z Rubies or Sapphires. Various Prospecting & Mining Concessions in the Lomagundi Dist is pending, & the Electrical Power will very shortly give a low power over three industries & no doubt the Corundum Should be worked anywhere in Lomagundi Dist for the present

13807

Under the circumstances I think we may let matters stand for a month to see what the Privy Council decide upon the matter. I suppose the Corundum is in the Lomagundi District.

Dated Nagara July 24 1900.

To

The Secretary to the Government of Mysore,
General and Revenue Departments.

SIR,

With reference to Government Proceedings No. 1165 F.F. 17-6-97 dated 1st July 1900, regarding the grant of a licence to Timoji Bin Hanji and son, of Shimoga, to search for and collect Corundum, for a period of three years in certain talooks of the District, I have the honor to submit the accompanying copy of their letter No. 407, of the 19th instant, from which it will be observed that they are willing to work the contract in the Shimoga taluk subject to the conditions specified in the Government Order, but that they ask for a reduction in the amount to be guaranteed for Heggeddenkatta to enable them to take up that taluk, as well as the Chandragutti and Nagar talooks. The realizations in the Heggeddenkatta taluk during the past three years, were, as shown in the Margin, Rs. 1897-98 Rs. 318-12-0, 1898-99 Rs. 94, 1899-1900 Rs. 180-4-0. Total Rs. 423-12-0. Average Rs. 141-4-0, which is Rs. 7-8-0 more than the amount (Rs. 133-12-0) to which the firm want the Minimum to be reduced

reduced.

2. If it is not possible to comply with the request of Messrs Petrie Hay & Son the license to be granted to them may be confined to the Sunnur taluk, and the right to collect Kurunga stones in the remaining taluks of the district may as usual be sold by public auction for the current year.

3. On receipt of final orders in this reference, I shall have the license engrossed on a stamp paper of the value of eight annas, and submit it to Government for signature, or issue the same under my signature as may be directed. Steps will also be taken to dispose of the item for the remaining taluks by public auction.

To

The Deputy Commissioner

Sir,

We have the honor to acknowledge receipt of your letter C. No 137, of 13th instant. We beg to accept the lease for three years for the collection of Coomdumdu of the Hunsur taluk, on the same terms as that granted to Mr. Foster. Copy of which was received with your letter C. No 1665, dated 19th February. Please inform us if the lease should be on stamp paper, and what is the amount of the stamp. On receipt of the order from you, we shall pay into the treasury here the guaranteed amount Rupees 1332-12-0, and we beg that you will grant us the order permitting us to collect the Coomdums at the same time.

We request to say that we consider the rate too high for the Heggeddoncy Kotta taluk, and without it, the cost of working the Chamraj nagar & Yenigeede taluks would be too heavy. We shall feel obliged, if you will inform us if it is possible to reduce the guaranteed amount for the Heggeddonee Kottah taluk, to the same amounts as Hunsur. We would then take up the whole

In the present case I

There are other proposals

FOR INFORMATION.

In connection with the recent order of Government No. 2185-6 R.F.175-92 dated 5th September 1900, which states that the license for corundum applied for by Messrs. Patrie Hay and Son of Hunsur should not be granted, I wish to bring the following points to your notice.

1. It is probable that in the near future a considerable industry be developed in connection with aluminium involving the use of corundum and other aluminous minerals.

2. The development of such an industry will necessitate the outlay of much capital and will depend upon the supply of water power available at convenient points.

3. Any leasing of the rights to collect corundum etc. would, if granted to others, considerably hamper the prospects and efficiency of a company prepared to expend the necessary capital referred to in para 2, while the return to Government from the lease of such rights would probably be insignificant.

4.

× Enclosed for reference.

4. Our present prospecting and mining leases include the right to work corundum and all other minerals and will require careful reconsideration before any more are granted.

5. In view of the above points, I would suggest that in future any applications for mineral rights of any kind whatsoever may be forwarded for consideration and disposal in the Geological Department and further that the practice of selling the right to collect corundum by auction be for the present discontinued. In place of the latter, tenders might be received for the collection of corundum from specified localities, when the merits of each tender can be enquired into and the localities for which such are accepted can be kept under observation.

6. Under the present system very little is known as to the places from which the corundum is taken and no adequate check is made of the amounts removed.
